(a) Includes Free Homestead Farms and Reserves.

\*Revised.

## VII—PRODUCTION

## No. 31—Estimated Net Value of Western Australian Production

For Primary Industries, net value of production is derived by deducting all marketing costs and the value of goods used in production (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.) from the value realized "at the principal market." For Manufacturing, it is obtained by deducting the value of goods consumed in the process of production (i.e., materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings) from the selling value "at the factory door."

Year	Agricultural	Pastoral and Trapping (a)	Dairy, Poultry and Bee Farming	Forestry and Fisheries	Mining and Quarrying	Total Primary	Manufacturing

§ Annual Declaration.      † Defined for basic wage purposes as the area comprised within a radius of 15 miles from G.P.O., Perth.

‡ As defined in the Land Act but excluding the Metropolitan Area.      (a) Relates to certain specified Goldfields Districts only.      (b) Rates for divisions shown not specifically declared by Court.

(See letterpress in June, 1942, issue.)      (c) Rates declared in Basic Wage Adjustment and Order No. 1 issued under the authority of National Security (Economic Organization) Regulations.      (d) Beginning of first pay period.

(e) Beginning of next succeeding pay period.      (f) Interim Basic Wage declaration authorized under amendment to National Security (Economic Organization) Regulations, operative first pay period after date thereof.

(g) Special determination incorporating increase of £1 for males and 15s. for females.      (h) Female rate increased to 65 per cent. of male rate as from 1st December 1951.      (i) Female rate increased to 75 per cent. of male rate from beginning of first pay period commencing on or after this date.

**No. 48—Minimum Rates of Wages payable to Adult Workers under Awards of Arbitration Authorities and Industrial Agreements, as at 31st March, 1960**

Rates relate to the Metropolitan Area except where otherwise stated, and are shown to the nearest farthing

## XIV—METEOROLOGICAL STATISTICS

(Supplied by courtesy of the Deputy Director, Meteorological Services)

**No. 50—Notes on the Rainfall and General Weather Conditions in Western Australia during January, February and March, 1960**

---

### **January**

*General*—The year opened with a low-pressure system of tropical origin extending from Central Australia over most of the continent. A new anticyclone from the Indian Ocean was moving slowly over the South-West division, and frontal action between these systems produced widespread rain in the southern part of the State during the first two days of the month.

During most of the month most charts showed an anticyclone off the South-West coast, so that winds over the southern half of the State were mainly of southern origin and varied between south-east and south-west.

A persistent low-pressure area covered the tropics and at times extended well southward. Low-pressure troughs connected with this system brought scattered thunderstorms to the central divisions.

In the northern tropics there were twice as many wet days as fine, even as far south as Hall's Creek. Farther south and west in the rest of the tropics, showers were mostly lighter and more scattered until the end of the month, when there were general rains in the West Kimberley, De Grey and Fortescue divisions.

On the 22nd of the month a tropical cyclone was located about 100 miles north of Yampi Sound. During the remainder of January it moved along the north-west coast to a position about 200 miles north-west of Onslow. At the end of the month it was still in this vicinity, and appeared to be weakening.

*Rainfall*—More than 20 inches of rain were received at Kalumburu in the far north, but heavy rains did not penetrate far southward. Nevertheless the month's total was above normal in many parts of the Kimberley division. Farther south, in the De Grey division, Roebourne received over 10 inches, most of it falling on the last day of the month. The average fall in this division was much lower, amounting to about two-and-a-half inches.

In the rest of the tropics and in the Gascoyne and North-Eastern divisions falls were patchy, some centres receiving over five inches while others received none. Less rain was registered in the West Gascoyne district than in the East Gascoyne.

General rain fell in the South-West division on the first two days of the year, and in the South Coastal sub-division there were fairly frequent light falls during the rest of the month. Very little rain fell elsewhere in the agricultural area after the first two days.

There were a number of falls in the South-Eastern and Eucla divisions during the first half of the month and again on the last day, many of them accompanied by thunderstorms. The average total in these areas was well above normal.

*Temperature*—Due to the persistence of winds of southern origin over the South-West division, day temperatures in this area were well below normal. Elsewhere the number of day temperatures above and below normal were approximately equal. The highest temperature,  $115^{\circ}$ , was recorded at Marble Bar on the 4th, Mardie and Onslow on the 24th and Gascoyne Junction, Mount Magnet and Leonora on the 29th.

Minimum temperatures were about normal. Each night a minimum of over  $80^{\circ}$  was recorded somewhere in the State. On two occasions a temperature of less than  $40^{\circ}$  was registered, in each case at Bridgetown, where the  $38^{\circ}$  recorded on the 16th and 27th was the lowest in the State for the month.

*Metropolitan*—Due to the persistence of the high-pressure system off the South-West coast, temperatures in Perth were mainly below normal. The average maximum was exceeded on only eight days, while the minimum was below normal on all but six. The highest temperature recorded was  $96.2^{\circ}$  ( $11.4^{\circ}$  above normal) on the 20th, and the lowest  $52.6^{\circ}$  ( $10.7^{\circ}$  below normal) on the 27th.

There were five wet days, the main ones being on the 1st and 2nd of the month when nearly half-an-inch was registered at the Bureau on each day. The storm on New Year's Day was accompanied by thunder, lightning and heavy hail in places, and rainfall in some suburbs was much heavier than at the Bureau. Streets, gardens and houses were flooded in the suburbs, and a tornado which was seen forming over Perth unroofed houses and destroyed trees in the Byford area.

Winds accompanying this storm were comparatively light, and the highest for the month, 46 miles per hour from the west-north-west, was recorded on the 7th.

## February

*General*—In the first few days of the month the tropical cyclone off North West Cape gradually weakened, and by the 5th it was discernible only as part of the extensive low-pressure area covering the tropics. Little rain was received in the vicinity of the cyclone during this time, but heavy falls were recorded in the Gascoyne division and in many places in the tropics.

After a break of a few days the low-pressure area over the tropics again became active, and good rains were received on practically every day until the 16th. After this, although the depression remained over the tropics until the end of the month, it produced little but scattered thunder-storm falls.

The Southern divisions were influenced at times by low-pressure troughs extending southward from the tropical system, bringing with them sultry conditions and scattered thunderstorms. These alternated with cooler, drier conditions, as anticyclonic cells from the Indian Ocean extended along the south coast.

*Rainfall*—In the far north frequent rains fell almost throughout the month, and at Kalumburu 21 of the first 26 days were wet. In the remainder of the Kimberley division most of the rain fell in the period 9th–17th inclusive, but farther south in the Gascoyne the main rains fell between the 1st and the 15th. Farther east these rains were more prolonged, and in the North-Eastern, South-Eastern and Eucla divisions frequent showers occurred until the 22nd.

The heaviest falls were reported from the Kimberley division where Derby received over 20 inches, but as far south as Mundiwindi over 12 inches were recorded, while totals of five to six inches were registered at places in the South-Eastern and North-Eastern divisions. The extent of the rainfall can be gauged from the fact that Carnarvon was flooded, and Giles, on the same latitude but 1,000 miles away on the eastern border of the State, registered nearly five inches, while Eucla on the far south coast received over six inches.

Widespread flooding resulted from these rains, and at one period many towns and station properties were isolated; road, rail and air communication having broken down due to wash-aways and flooding of airstrips. At the middle of the month road traffic to the northern half of the State was at a standstill. The North-West Coast Highway was cut at Galena by the Murchison River and the Great Northern Highway was flooded from Meekatharra to Nullagine, and not expected to be passable again for two months. The North-West Coast Highway re-opened after being closed for 10 days, and for the first time for three weeks it was possible to travel from Geraldton to Port Hedland over this route.

Rainfall in the agricultural area was patchy, over two inches being recorded in some places but none at all in others.

*Temperature*—Maximum temperatures were above normal in lower west coastal districts, but were mainly below normal elsewhere. They ranged from 111° at Mardie to 62° at Rawlinna and Forrest. The frequent rains in the north prevented the occurrence of any extensive hot spells, and at Marble Bar the century was exceeded on only 15 days, on 11 of which the maximum was below normal.

Minimum temperatures were above normal along the west coastal districts from Onslow southward, but mainly below normal elsewhere. The highest was 88° at Giles on the 1st, and the lowest 39° at Bridgetown on the 15th. This was the only occasion on which temperatures fell below 40° anywhere in the State.

*Metropolitan*—In Perth there were no really hot days, and for the first time since 1905 summer finished without the temperature reaching 100° at any time. Despite this, however, February temperatures were more frequently above normal than below, and both the mean maximum and mean minimum were above the average for the month.

There were three wet days, but the total rainfall for the month was about 50% below normal.

Winds were not particularly strong, but reached 39 miles per hour from the east-south-east on the 13th, and on several other occasions a gust of 38 miles per hour was recorded.

### March

**General**—During the first half of the month a series of anticyclones moved across the southern half of the State, at times extending well into the tropics. A shallow low-pressure area covered the northern tropics during this time, but produced very little rain except on the far north Kimberley coast.

About the middle of the month a cyclone formed north of Broome, moving inland across the coast on the 16th. It faded rapidly during the next few days bringing heavy rains to some North and East Kimberley stations.

A few days later another cyclone moved across the Northern Territory to a position north of Wyndham and from there down the north-west coast, passing Onslow on the 26th. It then turned down the west coast and accelerated, passing Perth on the afternoon of the 27th, and moving across the lower South-West during the night.

Damage was greatest at Carnarvon where the plantations were devastated and many buildings in the town were unroofed and some wrecked. Farther south damage decreased, though houses were wrecked at Mullewa and minor damage caused in the metropolitan area and southward.

This disturbance was followed by a large anticyclone from the Indian Ocean, and at the end of the month this high-pressure system covered the southern half of the State, while a shallow low-pressure region covered the Kimberley division and adjacent areas.

**Rainfall**—There were frequent showers during the month on the far North Kimberley coast and in south coastal areas, but in the rest of the State most rain was received as a result of the tropical cyclones which developed about the middle of the month, and during the fourth week.

The first brought heavy falls to the North and East Kimberley divisions, Turkey Creek reporting over 11 inches on the 17th. About this time many stations received much heavier daily falls than they did during the prolonged rains of February, but on the other hand many stations—particularly in the West Kimberley—received little or no rain from this storm.

The second storm brought lighter but more widespread falls to the Kimberley division, very little to the De Grey division, and good falls to the coastal districts of the Fortescue and Gascoyne divisions. Farther south rains from this system extended farther inland and moderate to fairly heavy rains were received at most places in the South-West and South-Eastern divisions. Isolated good falls were reported also from the North-Eastern division, but other stations in this area received only a few points.

**Temperature**—In the De Grey division temperatures were above normal, elsewhere they were mainly below.

Marble Bar reached the century on all days but the 27th, but the highest temperature for the month, 109°, was reported from Mandorah and Mardie stations, almost on the coast.

The lowest temperatures were reported on the first and last days of the month when 38° was reported from several of the colder places in the South-West.

**Metropolitan**—Rainfall in Perth totalled 227 points on eight wet days, bringing the total for the year to 355 points, approximately two inches above the normal fall for the first three months.

Most of the month's rain fell with the cyclone which passed Perth on the 27th. On this day southerly winds gradually increased in strength and backed to northerlies by about 1.30 p.m. after which they strengthened further, reaching a speed of about 40 m.p.h. about 3.15 p.m. Shortly after this a gust reached 70 m.p.h. Winds then backed to north-north-west and decreased to an average of 20 m.p.h. by 5 p.m.

The centre apparently passed almost over Rottnest Island, where winds however, were considerably lighter than they were at Perth.

Around the metropolitan area a few buildings were unroofed, fences, trees, etc., were blown down, but there was little serious damage.

Temperatures were below normal on an average of two days in three. The maximum reached the average for March only twice after the 13th, while the minimum was below normal in all but four days during the first three weeks.

## XVI—MISCELLANEOUS

### No. 55—Building Operations—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by governmental agencies and the activities of "Owner-Builders." The term "Owner-Built" (shown hereunder as "O-Built") refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

(a) For the purpose of the Census, a "dwelling" is any habitation occupied by or for occupation by a household group living together as a domestic unit, whether comprising the whole or part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-roomed shack to a multi-roomed hotel or institution.

(b) Persons (both passengers and crew) not enumerated elsewhere who at midnight between the 30th June and the 1st July, 1954, were on board ships or were travelling on long-distance trains or aircraft.

(c) Represents population at Census, 30th June, 1954, plus natural increase and recorded net migration since that date.

## No. 58—Retail Sales classified according to Commodity Groups

The figures in the table below relate to goods (as distinct from services, accommodation, entertainment, meals, etc.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards).

The figures for the years 1948-49, 1952-53 and 1956-57 were obtained from Censuses taken in respect of those years, whereas particulars for the other periods shown are estimates based on sample surveys.
